MOBILE BASE CABINETS, DOUBLE DRAWER & DOOR

- Built to SEFA standards, Cabinets are constructed of welded 18 and 20 gauge steel with a chemical resistant epoxy powder coat paint finish.
- · Drawers have full-extension ball bearing, plated drawer slides.
- Doors have 5-knuckle stainless steel institutional type hinges.
- Sound deadened doors and drawers have "double pan" construction with a bar pull.
- A removable bottom pan and a single full-depth adjustable shelf is included with each cabinet. Additional shelves available; consult factory.
- Available with or without locks. Locking cabinets with multiple doors/ drawers per unit will have the same key number per unit. Individual units will be keyed randomly and differently from the other. Contact factory for other keying options. Available key numbers are LL226 thru LL327.
- Mobile units have a solid steel top and back with two front total lock casters and two rear swivel casters.

NOTES -

- » Base Cabinets can be used in conjunction with UltraFrame, Lab Legs and support brackets; see pages 2.2, 10.27-10.29.
- » Recessed pulls available; consult factory.

SUSPENDED BASE CABINETS, DRAWER/DOOR

- Suspended Base Cabinets can be hung from the underside of surfaces and 4-Legged Table Cabinet Mounting Brackets.
- Built to SEFA standards, Cabinets are constructed of welded 18 and 20 gauge steel with a chemical resistant epoxy powder coat paint finish.
- · Drawers have full-extension ball bearing, plated drawer slides.
- · Doors have 5-knuckle stainless steel institutional type hinges.
- Sound deadened doors and drawers have "double pan" construction with a bar pull.
- A removable bottom pan and a single full-depth adjustable shelf is included with each cabinet. Additional shelves available; consult factory.
- Available with or without locks. Locking cabinets with multiple doors/ drawers per unit will have the same key number per unit. Individual units will be keyed randomly and differently from the other. Contact factory for other keying options. Available key numbers are LL226 thru LL327.
- · Units are open on top and have a solid steel back panel.

— NOTES —

- » Load capacity (includes cabinet and content) cannot exceed 500 lbs. Load capacity of the suspended cabinet does not supercede support component load rating
- » The suspended component(s) reduces the surface load capacity by an amount equal to the suspended component and its contents.
- » Recessed pulls available; consult factory.
- 4-Legged Table Cabinet Mounting Brackets sold separately; see page 10.16.

BASE CABINETS, SITTING HEIGHT, DOUBLE DRAWER

- · Built to SEFA standards, Cabinets are constructed of welded 18 and 20 gauge steel with a chemical resistant epoxy powder coat paint
- Drawers have full-extension ball bearing, plated drawer slides.
- Sound deadened drawers have "double pan" construction with a bar pull.
- Available with or without locks. Locking cabinets with multiple doors/drawers per unit will have the same key number per unit. Individual units will be keyed randomly and differently from the other. Contact factory for other keying options. Available key numbers are LL226 thru LL327.
- Mobile units have a solid steel top and back with two front total lock casters and two rear swivel casters.
- Stationary units are open on top, contain a removable back panel and include leveling glides.

— NOTES —

- Base cabinets can be used in conjunction with UltraFrame, Lab Legs and support brackets; see pages 2.2 - 2.3 and 10.25 - 10.27.
- » Double drawer unit is only available in sitting height (29" high).
- » Recessed pulls available; consult factory.

SINK BASE CABINET, ADA, STANDARD

- Built to SEFA standards, Cabinets meet ADA height requirements and are constructed of welded 18 and 20 gauge steel with a chemical resistant epoxy powder coat paint finish.
- Sound deadened doors have "double pan" construction with a bar pull.
- Doors have 5-knuckle stainless steel institutional type hinges.
- Features a removable bottom pan as well as open upper back for access to plumbing.
- Available with or without locks. Locking cabinets with multiple doors/ drawers per unit will have the same key number per unit. Individual units will be keyed randomly and differently from the other. Contact factory for other keying options. Available key numbers are LL226 thru LL327.

NOTES —

- » Sink Bases can be used in conjunction with UltraFrame, Lab Legs and support brackets; see pages 2.2 - 2.3 and 10.27 - 10.29.
- » Recessed pulls available; consult factory.

CANTILEVER BRACKETS

- Lab Cantilever Brackets provide manual height adjustable support for 24" and 30" deep work surfaces mounted to UltraFrames supported by Lab Legs.
- Cantilevers also provide mid support for surfaces wider than 60".

— NOTES —

- » Use 24" cantilevers with 24" and 30" deep surfaces. 36" deep surfaces should be supported with Lab Legs and Adjacent Brackets; see pages 10.27-10.29.
- » 72" and 96" wide frame-mounted surfaces must be supported in the center by Lab Cantilever Brackets. Specify one 18" cantilever per 24" and 30" deep surface and one 24" cantilever per 36" deep surface.
- » Cantilever brackets cannot be used with Lab Reinforcement Bars.

LAB HEIGHT B SUPPORTS

- Brackets provide manual height adjustable support for Ultra or Work Surfaces mounted to Ultra Leg Supports.
- Height range is 26½" to 36½" for CLM and 31½" to 41½" for CLT.
- Lab Height B Supports allow for surface height alignment with Lab Leg mounted surfaces and provide clearance for Base Cabinets at the nominal 29" and 35" bracket heights.
- Extended brackets are for use with 36" deep surfaces, while the 18%" deep brackets are for use with 24" and 30" deep surfaces.

NOTES —

» 72" and 96" frame-mounted surfaces must be supported in the center by Lab Cantilever Brackets. Specify one 18" cantilever per 24" and 30" deep surface and one 24" cantilever per 36" deep surface.

LAB / LAB LEGS

LAB LEGS

- · Lab Legs provide standing support for UltraFrames.
- · Legs bolt to connection points on both the front and back sides of UltraFrames and Connector Posts (80" high max).
- · Legs are each equipped with a leveling glide. Lab Legs with Casters also include a 4" diameter polypropylene caster with totalock brake (simultaneously locks swivel and wheel) and can only be attached to UltraFrames with Casters. Lab legs with Glides bolt to UltraFrames with Glides or Connector Posts.
- · Lab Legs cannot be used to support 96" high UltraFrames.
- Surfaces can be mounted directly to the top of Lab Legs mounted inboard of the frame. Outboard mounted Lab Legs require Adjacent Brackets to support the surface.

— NOTES —

- » The nominal Lab Leg depth must match the nominal surface depth.
- » Adjacent Brackets sold separately; see page 10.28.

SURFACE REINFORCEMENT BARS

- Lab Reinforcement Bars provide horizontal support under work surfaces for increased rigidity.
- Bars are sold in pairs and mount at the front and 20" behind the front of Lab Legs.
- Bars adjust over a 6" range to accommodate inboard and outboard Lab Legs and Adjacent Bracket clearance.
- Finish is Black.

— NOTES —

» Lab Reinforcement Bars cannot be used with Lab Cantilever Brackets.

PHENOLIC LAB SURFACES

- 1" high solid Phenolic Lab Surfaces are full width and depth and can be mounted to Base Cabinets and/or surface supports.
- Surfaces have smooth 1/8" radius corners and edges.
- Surfaces are not predrilled, but include a drip groove inset from the front edge of the surface.
- Phenolic resin material is specifically manufactured for highly corrosive environments and provides exceptional chemical and wear resistance.
 Contact factory for detailed chemical resistance testing data.
- · Load capacity 300 lbs. evenly distributed when supported every five feet.
- Finish is Black.

— NOTES —

- » Mounting hardware is not included; recommended attaching method is silicone adhesive.
- » See Section 4 for Phenolic Backsplash.

LAB LEG PANELS

- Metal Lab Leg Panels finish the side faces of Lab Legs.
- Lab Leg Panels attach through holes in the Lab Legs with PEM studs and connector nuts.
- Lab Leg Panels for Lab Legs with Casters have clearance at the bottom for caster swivel radius.
- Panels can be used in conjunction with Adjacent Brackets and Reinforcement Bars.

— NOTES —

» Lab Leg Panels must be ordered with the same nominal height, depth and glide/caster style as the Lab Leg it will mount on.

LAB CABINET FILLERS

Rear Base Cabinet Fillers

- Rear Fillers are used in the space between the rear of the cabinet and the wall.
- Fillers provide a clean finished look when surfaces are deeper than the base cabinets and conceal any utilities that are routed behind cabinets
- Includes a filler panel and a slip joint, which mounts to the wall.

Inside Corner Base Cabinet Fillers

- Corner Fillers are used where two base cabinets meet at a ninety degree angle.
- Includes an angled filler panel, which provides either 1", 2" or 4" clearance between cabinet fronts, mounting clips to attach the filler to the cabinets, and a toekick to conceal cabinet spacing.

— NOTES —

» Hardware is not provided to mount filler slip joint to wall.

LAB CABINET FILLERS, CONT'D

Front Cabinet Fillers

SYMBIOTE

- Front Fillers are used when there is excess space between the side of the Base Cabinet or Floor Case and a wall.
- Filler kit includes a filler panel, mounting clips to attach the filler to the cabinet, a slip joint, which mounts to the wall and a toekick to conceal cabinet spacing.
- · Filler panel and toekick can be cut to width in the field to accommodate custom spacing.

— NOTES —

» Hardware is not provided to mount filler slip joint to wall.

LAB LEG FILLERS

- · Lab Leg Fillers are used to fill the gap between Lab Legs and adjacent Base Cabinets in an end of run configuration using a Three-way Connector.
- · Fillers mount directly to Lab Legs without the need to add holes or hardware to either the leg or adjacent cabinet.

NOTES -

- » Hardware to attach Lab Leg Filler is included with the Lab Leg Panel; see page 10.31. If Lab Leg Panels will not be used in conjunction with Lab Leg Fillers, please consult factory for Lab Leg Filler hardware ordering information.
- » Order two half gap style fillers if the difference between the total cabinet width and frame run is $9\frac{1}{2}$ " or greater. Order a single full gap filler if the cabinet/frame run difference is 5½".
- » Two half gap style fillers are shown in the above image.

- Undermount sinks are installed under a cutout in the surface. Sink supports are required (see below).
- Stainless steel sinks are constructed of 18 gauge, type 304 stainless steel, polished to a #4 finish.
- Stainless steel sinks include stainless steel drain with crumb cup strainer and tailpiece.
- Epoxy sinks are resistant to many acids, solvents and other inert chemicals.
- Epoxy sinks include a sink outlet with strainer plate and integral tailpiece.

— NOTES —

- » Sinks can be paired with Symbiote phenolic and stainless steel worksurfaces. (See Section 4).
- » Stainless Steel sinks are certified to ASME A112.19.3.

SINK, DROP-IN

- Drop-in sinks are top mounted. This type of installation seals the sink cutout and eliminates worksurface overhang.
- Stainless steel sinks are constructed of 18 gauge, type 304 stainless steel, polished to a #4 finish.
- · Stainless steel sinks include stainless steel drain with crumb cup strainer and tailpiece.
- · Epoxy sinks are resistant to many acids, solvents and other inert chemicals.
- · Epoxy sinks include a sink outlet with strainer plate and integral tailpiece.

— NOTES —

- » Sinks can be paired with Symbiote laminate, phenolic and stainless steel worksurfaces. (See Section 4).
- » Stainless Steel sinks are certified to ASME A112.19.3.

SINK FAUCETS, UNDERMOUNT AND DROP-IN

Four-Arm Handle Faucet

- Deck mounted mixing faucet with vacuum breaker for hot and cold water. 6" swing gooseneck.
- Forged brass body and four-arm handles with color-coded index discs.
- ¾" NPS female outlet with removable anti-splash serration hose end

Blade Handle Faucet

- Deck mounted mixing faucet with vacuum breaker and blade handle(s) for hot and cold water. 6" swing gooseneck.
- Forged brass body and blade handle(s) with color-coded index disc(s).
- %" NPS female outlet with removable anti-splash serration hose end.

NOTES —

- » Fixture is certified by CSA International to comply with ASME A112.18.1M and CSA B125.1.
- » Fixture is fully assembled and factory tested prior to shipment.

EYEWASH STATIONS

Eyewash/Drench Hose Unit, Deck Mounted

- Dual purpose, eyewash/drench hose assembly can be left as a fixed eye wash or removed to use as a drench hose.
- Two outlet heads with "flip-top" dust covers are mounted on chrome plated brass supply arms.
- Locking clip engages when handle is depressed. Valve stays open until locking clip is released.
- Includes an 8' reinforced PVC hose. 275 PSI hose rating. Unit is completely assembled and water tested prior to shipment.

Swing Activated Eyewash Unit, Deck Mounted

- Eyewash unit is deck mounted on counter next to sink. Spray heads swivel 90° from storage to operational position.
- Includes twin spray heads with protective covers and a large push handle. Water flow is activated by flag handle; specify LH or RH.
- Unit is completely assembled and water tested prior to shipment.

— NOTES —

- » Eyewash stations can be easily mounted next to the sink for maximum accessibility.
- » Eyewashes meet the provisions of ANSI Z358.1-2014.

BALL VALVES

Ball Valves

- Single or double ball valves offer on/off control of lab gasses at pressures up to 75 psi.
- Fixtures have a forged brass valve body and lever handle with chrome-plated brass ball and molded PTFE seals.
- Valves have a %" NPT male inlet with %" IPS mounting shank, washer and locknut.
- %" NPT female outlet includes removable ten serration hose end and color-coded index disc on the quarter turn lever handle.
- Finish is polished chrome plating.

Hoses

- Hose assemblies have a %" NPT male connector on each end, include a %" NPT female elbow connector and are rated for 300 psi maximum working pressure.
- PVC style hoses have a 5%" O.D. reinforced PVC hose with nylon braid and 3%" I.D. PVC inner core.
- Stainless steel hoses have a stainless steel overbraid with PTFE inner core.
- · Hose length specified in inches (096 and 120 are standard lengths).

— NOTES —

- » Fixture certified by CSA International to comply with ASME A112.18.1M and CSA B125.1.
- » Fixture is fully assembled and factory tested prior to shipment.

VERTICAL UTILITY CHASE, ERGOSTAT RISER FRAME

- · Vertical utility chase offers utility flexibility in the lab without compromising the height adjustability.
- · A total of three utility control/outlet knockouts are placed within easy reach on the vertical chase.
- Standard wall faceplate knockouts are provided at the top and bottom of the front of the Vertical Utility chase.
- Top access router included with each vertical utility chase.
- · Vertical utility chase housing divider allows for separation of utilities within the chase.

— NOTES —

- » Housing dividers sold separately.
- » Data jack ports and faceplates not included.
- » 43" Vertical Utility Chase Housings can only be mounted on ErgoStat Riser Frames.

VERTICAL UTILITY CHASE, ULTRAFRAME

- Vertical utility chase offers utility flexibility in the lab without compromising the height adjustability of work surfaces on benches.
- A total of six utility control/outlet knockouts are placed within easy reach on the vertical chase.
- Standard wall faceplate knockouts are provided at the top and bottom of the front and back sides of the Vertical Utility chase.
- Top access router included with each vertical utility chase.
- Extender conceals utilities routed from the ceiling to the top of the UltraFrame and can be trimmed on site as needed for ceilings up to 10'6" H
- Extender and housing dividers allow for separation of utilities within the chase and can be trimmed in the field as needed.

— NOTES —

- » Housing dividers and extenders sold separately.
- » Data jack ports and faceplates not included.
- » Color matched ceiling trim plate included with extender.
- » 80" Vertical Utility Chase Housings and Extenders only mount on 80" high UltraFrames.

CEILING SERVICE PANEL, QUICK CONNECTS

Ceiling Service Panel

- Ceiling Service Panels are designed to fit in standard 2' x 2' ceiling grid openings.
- · Made with 16 guage sheet metal, ceiling service panels have (16) quick connect knockouts and (8) single electrical and/or data knockouts.

Quick Connect Fittings

- · Quick Connect bodies and plugs are finished with polished chrome plated brass.
- Internal guick connect valve components are stainless steel to assure compatibility with the service and to assure durable performance.
- · Quick Connect Plugs have an internal shut-off valve that closes when the valve is disengaged.

Cover Plates

· Cover Plates are stainless steel.
