

ErgoStat® Pro Electric Workstation

HEIGHT ADJUSTABLE

ErgoStat Pro...Your Office-to-Lab Workstation

If you've seen our flagship ErgoStat, you'll recognize the height adjustable mechanism we pioneered in the early 1990s. Developed from a customer's request, the ErgoStat Pro has a **greater range of adjustability** and a **lighter load capacity**.

This workstation has all the options of our original ErgoStat—ergonomic positioning and vertical storage—plus new anti-collision technology. Much like your favorite pair of jeans, a workstation should fit properly, move with you and work as hard as you do. The **26-inch height adjustment** feature is an ideal range for the majority of end users for light-duty office and lab applications.

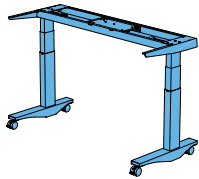

Design Features

- Anti-collision technology
- 26" height adjustment range
(22.5-48.5" from top of worksurface)
- ADA-compliant and custom top sizes
- 250 pound dynamic base load capacity
- Base widths 36-42-48-60-72 inches
- Electric lift legs move 1.5 inches per second with a 10% duty cycle
- Casters with locking brakes or glides
- Riser Frame (optional) provides 29" of vertical storage above top of surface
- Worksurface depths 24-30-36 inches
- Optional battery pack kit
(freedom from outlets)
- Control panel with three memory settings available
- Voltage 120V AC 60Hz or 230V AC 50Hz
- Low standby mode of 0.1 W
