WE DESIGN IT. WE PLAN IT. WE GET IT.

USER-CENTRIC PRODUCT KNOWLEDGE

We have a deep knowledge of health / life science labs. Our founder began his career with the Herman Miller® Research Corporation and later, the Action Office® team, launching the world's first systems furniture. Subsequently, he led the implementation team, the first product manager for the Health Science Division. We truly understand what people need to be safe, comfortable and productive.

INDUSTRIAL STRENGTH FURNITURE MEETS WORLD-CLASS DESIGN

From high-tech tables and industrial benches, to modular casegoods and plug/play utilities, our furniture adapts with ease. Visualize your lab in high resolution renderings. Our dedicated design and engineering teams supports you from idea to reality, including custom requests.

APPLICATIONS

Education. Government. Healthcare. Technology. Security. Biotech. Makerspaces.

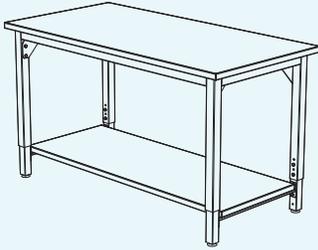

HEIGHT ADJUSTABLE TABLES

Symbiote offers a wide variety of electric and pin-adjustable table models. Our bases are built to stand up to the most stringent environments with load capacities up to 750 lbs dynamic and 1,000 lbs static. The tops are available in laminate, ESD laminate, Phenolic, Epoxy and Stainless Steel. These tops range in size from 24-48 inches in depth and widths of 36-96 inches.

MODULAR SYSTEMS FRAME AND RISER FRAMES

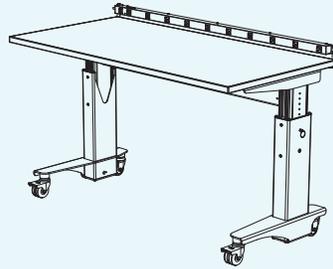

UltraFrame is a modular frame system that is the backbone of the layout. The frames can hold all your power and data, along with all the needed componentry-up to 1,000 lbs per side. Available in three heights, five widths and available with casters or glides, it is the perfect building block for your lab environment or workspace.

Riser Frames attach to ErgoStats and 4-Legged Tables providing a vertical storage solution and division space. The frames can hold a variety of modular components along with electrical to provide a flexible, dynamic workstation.

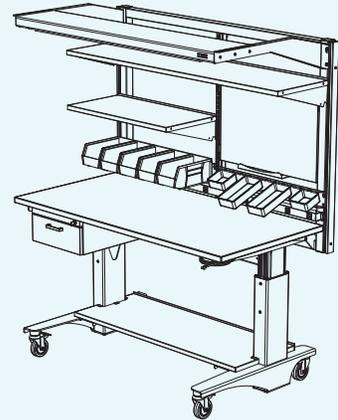

THE WORKHORSE

4-Legged, pin-adjustable table lifts 1,000 pounds, evenly distributed.

POWER AND UTILITIES

Electric or pin-adjustable Table Base is available in a 15 or 18-inch travel range and lifts 750 pounds, evenly distributed.

HOW YOU MOVE

Gain vertical space with a Riser Frame. Bin rails, shelves and other hanging work tools move safely with you as the surface is adjusted up/down.

Dispensing rails and subcontainers

Locking casters on frames, tables, base cabinets

Totes/Frame

Drain board

Bins for small parts

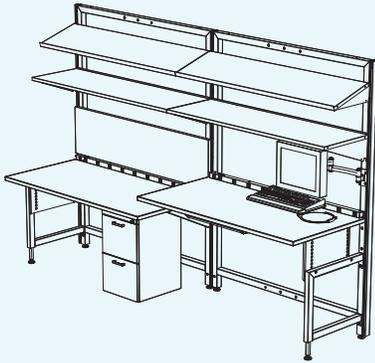

Overhead storage with privacy or glass front

Shelving in five styles

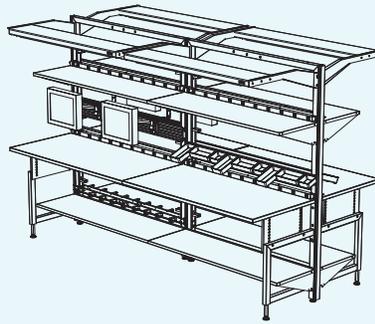

LED high output task lighting

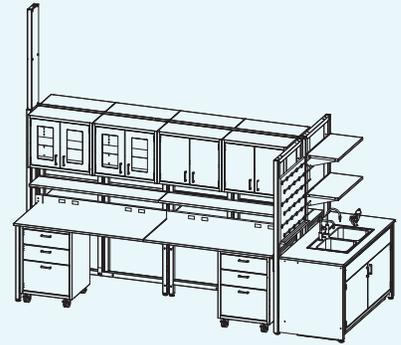

VERTICAL STORAGE

Taller workstations provide extra overhead storage. Customize it with varied height surfaces and casters for mobility.

CONFIGURE BACK-TO-BACK

Double-sided designs save facility space. Slatwalls free up surfaces and organizes tools.

OPTIONS TO GROW

Drying rack and trough, placed over sink, dries glassware. Vertical utility chase provides plug/play access.
