SYMBIOTE

FUME HOODS

SAFETY. FUNCTION. FASHION.

SAFETY

When it comes to laboratory environments, safety is not an option - it is essential. Symbiote Fume Hoods are engineered to meet the exact specifications needed to protect your people, your research and your facility.

FUNCTION

With a near infinite combination of Fume Hood types, components, and add on options, you can create a Hood designed to work as hard as you do. Configure the right combination of features, functionality, and performance for your laboratory.

FASHION

When you look good, you feel good. Symbiote Fume Hoods are color matched to the rest of our offering allowing the Fume Hood, supporting casework, and adjacent furniture to share the exact same color for a cohesive, intentional look.

Everything for the space: furniture, tables, casework, and the final piece, fume hoods. Outfitting education, research, and industry spaces.

Acid and Flammability cabinets complete with vent kits work in conjunction with the hood to safeguard the space.

All the plumbing and electrical fixtures available as needed. Optional pre-plumbed and pre-wired solutions to help simplify installation.

No hood too big. Our largest standard size is 90" high by 96" wide. Need a hood large enough for a Hi-Lo to drive into? We can do that, too.

STANDARD FINISHES

Argent Silver | Arctic White | Black | Grey Light | Neutral White | Sand Textured

ALTERNATIVE FINISHES

Burgundy | Dark Taupe | Deep Blue | Green | Ivory | Light Almond | Light Blue | Platinum | Sea Blue
